

Dear Chis,

This letter is in response to your request for additional information dated 2/1/2007. The letter states that the committee may have failed to file one or more of the required 48 hour notices. The contributions in question fall on two days, October 20, 2006 and October 24, 2006. The committee filed 48 hour notices to disclose those contributions on October 20th and October 25th using their own software. After filing the notices the committee received copies of filing confirmations via email and fax from the Commission. Copies of the confirmations will be sent to you by mail. Because the notices did not include transaction details the committee did not realize that none of the receipts showed up on the filing. The committee had successfully used its software to file notices in the pre-primary period and on numerous other days during the pre-general period. The error was inadvertent and going forward the committee will check the filing details on the website after receiving filing confirmations. In addition, the committee made the decision to switch software vendors to avoid this problem in the future. Beginning with the April 15, 2007 filing we will be using the new software.

The committee amended its 30 Day Post General Report on 2/5/2007 to correct the Column B discrepancies.
